Our medical pulp products are designed for general purpose use in surgeries, hospitals and care facilities. We understand the importance of products that are not only cost effective, but which also give healthcare providers the confidence to perform tasks secure in the knowledge that safety and quality are key elements of the design and manufacturing processes allowing infection control strategies to be met.

Ergonomically designed for ease of use with a smooth, high-quality finish, helping to maintain hygiene standards and reduce the risk of cross contamination. Our products include items that are purpose built for managing a wide number of different, but entirely typical nursing situations that occur on an everyday basis, such as holding vomit, urine or faeces.

We understand the importance of products that are not only cost effective, but which also give healthcare providers the confidence to perform tasks secure in the knowledge that safety and quality are key elements of the design and manufacturing processes allowing infection control strategies to be met.

Our medical pulp products are made from recycled and maceratable pulp material in compliance with PAS29:1999 for healthcare disposable products and Medical Devices Directives 93/42/EEC - Class 1 as amended by Directive (2007/47EC) where required. Consequently, the products specifically designed to contain human waste will do so for a minimum of 4 hours.

# Medical pulp and the modern sluice/dirty utility room

In the modern environment with an increased focus on healthcare acquired infections (HCAI's) and the seemingly endless demands on healthcare budgets, paper pulp is considered to be a clean and highly cost effective solution.

Disposable pulp products are considered a sustainable product as they are produced from recycled materials such as phone books, newspapers, magazines - in fact any product made of paper fibres.

Using single use pulp products to dispose of human waste certainly reduces the risk of cross-contamination and re-contamination from products moved from ward to ward.

DDC Dolphin medical pulp is made up of 100% biodegradable and compostable raw material, and by using along side one of our Pulpmatic macerators the waste material can be disposed of effectively through the existing drainage system.

This reduces the handling of contaminated products to the minimum, for the clear benefit of all staff involved in patient care.

By switching to pulp utensils, instead of stainless steel or plastic; staff and healthcare providers can reduce costs by avoiding costly equipment / utensil purchases, eliminating washing and storage of re-usable utensils.

## Medical Pulp Range

### Hygenex Bedpan (Figure 8) Liner & Accessories

#### Product Description

Suitable for general toileting of patients and can be used in bed or commode chair. The liner is placed inside the support before use. Ideal for patients confined to bed due to illness or after surgery. Also available

#### Product Description

Hygenex fluid weighing scales. Electronic scales, quick and easy to use with easy clean surface. Maximum 5000 ml (for indication purposes only).

Order Code	Description	Qty
HYGSCALES	Fluid weighing scales	1

## Introducing our range of Eco-Friendly patient care and personal hygiene and cleaning wipes.

Our Eco-Friendly wet and dry wipes are made from 100% non-woven cellulosic material and are a convenient solution for simple-yet-effective skin and surface cleansing, the Hygenex range of wet and dry wipes are soft, strong and easy to dispose of – just flush them away when you're done.

Developed to deliver exceptional performance whilst offering outstanding environmentally friendly benefits, they are fully tested and compliant with EDANA & INDA standards, while also being suitable for macerators, where required.

What's more, your conscience can be clear knowing that Hygenex wipes are made from 100% natural materials, which will quickly break down into non-toxic components. This means they'll cause no harm to the environment – or your plumbing systems.

Designed with all personal care and cleaning tasks in mind, they are ideal for use at home, in healthcare, or anywhere with a need for quick and reliable cleansing.

# Eco-Friendly Wet & Dry Wipes

The Hygenex range of wet and dry wipes provide healthcare professionals with a high-quality product which can be disposed of in bedpan washers, macerators, slop hoppers or toilets. Hygenex wipes are made from 100% non-woven cellulosic material which will quickly break down into non-toxic components, causing no harm to the environment or your plumbing systems.

Soft yet strong, these cleaning wipes have been developed to deliver exceptional performance whilst offering outstanding environmentally friendly benefits. They are fully tested and compliant with EDANA & INDA standards of flushability.

## What Makes Our Wipes Different?

To put it simply, they are fully compostable – they completely break down and disperse into 100% organic matter when disposed of in bedpan washers, macerators, slop hoppers or toilets.

Whilst many competitor products can claim that they are biodegradable, this simply means that they will eventually break down into smaller pieces by natural processes. In reality what this means is they decompose into microplastics, further polluting our already dangerously damaged natural environment.

- Advanced non-woven 100% cellulosic material
- Passed all 7 tests for EDANA & INDA standards of flushability
- 100% Biodegradable, compostable, dispersible, flushable, maceratable & plastic free
- Alcohol free
- Unique market-leading strength and performance
- Suitable for use on all areas of the body including intimate areas
- Suitable for all skin types and ages from newborn to the elderly

Designed with all personal care and cleaning tasks in mind, they are ideal for use in hospitals, care homes, nursing homes and domiciliary care.

## Eco-Friendly Skin Cleansing Wet Wipes

For use on hands, body and face and suitable for all skin types, including sensitive skin.

- 30 wipes per pack
- Dermatologically tested and hypoallergenic; suitable for all skin types
- Gentle and highly effective skin cleanser
- Soap, lanolin and alcohol free
- Individual wipe size 200 x 160 mm

## Eco-Friendly Patient Dry Wipes

An all-purpose wipe suitable for general surface and skin cleansing.

- 75 wipes per pack
- Dual application wipes for use on surfaces or skin
- Suitable for use with detergents, disinfectants and skin cleansing products
- Highly absorbent
- Individual wipe size 270 x 260mm

## Benefits of Eco-Friendly Wipes vs Polypropylene Wipes

More absorbent - less product usage

Helping save vital nursing time

50% Softer

Fully flushable - better waste disposal

Eco Friendly - 100% organic matter

## Eco-Friendly Patient Dry Wipes
