

Peeling back true saving with Hygenex wipes...

Can you really afford not to switch?

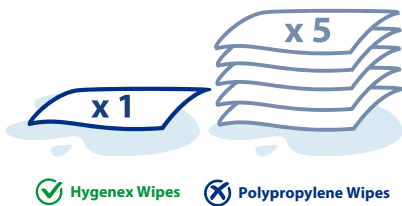

LONG TERM BENEFITS WITH HYGENEX WIPES

Vs

LONG TERM COSTS WITH POLYPROPYLENE WIPES

- Better cost savings -

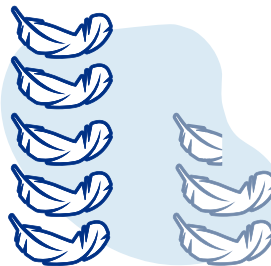

Hygenex Wipes are 5 x more absorbent than polypropylene based wipes as they do not contain any plastic. Plastic will not soak up fluid! 5 x more absorption means you'll use 4 less wipes to soak up the same amount of fluids. **Less product usage = cost savings.**

- Better for the patient -

Hygenex Wipes are 50% softer

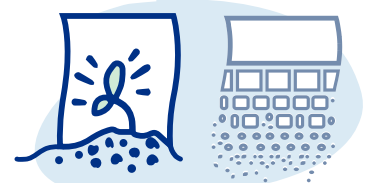

than polypropylene alternatives; therefore this superior product ensures a nicer experience for both patients and clinicians alike.

- Better for the planet -

Hygenex Wipes are eco-friendly and **will completely break down into 100% organic matter.**

Polypropylene based wipes will eventually break down into microplastics, causing serious threat to the environment.

- Better for staff -

From surface cleaning to intimate personal care, Hygenex Wipes makes light work of a range of dirty tasks whilst being quick and easy to dispose of; **helping save vital nursing time.**

- Better waste disposal -

Hygenex Wipes are fully flushable

without causing drainage blockages, thus reducing maintenance time, costs and inconvenience.

Hygenex wipes are designed to care for those who need them, as well the planet.
