

Moving & Handling Products

Stand Assist Hoist

Confident Assisted Standing

Designed to support users with lower limb strength, enabling **safe standing and assisted transfers** while reducing strain on caregivers. **Certified to EN ISO 10535** it meets strict **international safety standards**.

A **fully adjustable frame** allows personalised positioning with adjustable arm supports, knee supports, and lower leg alignment. Ergonomic grips and a strong footplate (up to **150 kg capacity**) providing secure, confident support.

With **lever-operated base legs for easy wheelchair access**, smooth electric lifting and **twin braked castors**, the lift enables controlled transfers. Integrated safety features and an **emergency stop** provide added reassurance

Mobile Hoist

Safe, Smooth Transfers

Electric mobile hoists provide **safe, comfortable patient transfers** across a wide range of care settings. Certified to **EN ISO 10535**, they meet strict international safety standards for complete peace of mind.

A **compact, foldable frame** allows convenient under-bed storage, while smooth electric lifting supports **controlled transfers between bed, chair, or bathroom**.

Available in **150 kg, 180 kg, and 220 kg capacities**, they are **easy to manoeuvre, simple to use, and designed for dependable everyday care**.

Overhead Hoist

Effortless Lifting, Safer Care

Our **ceiling hoists** provide **safe, smooth patient transfers while reducing strain on caregivers**. Designed for **effortless, single-handed operation**, they deliver controlled lifting across nursing, residential, and therapeutic settings.

A **detachable hoist unit** enables use across multiple rooms, while the **compact design** suits lower ceiling heights and helps maximise available floor space.

Available in **200 kg and 275 kg capacities**, they support **dignified transfers between bed, chair, and hygiene areas**, delivering reliable performance every day.
