Sluice Room Solutions

Panamatic® Bedpan washer disinfectors

Reusable bedpans, commode pots, and urine bottles are preferred by many healthcare providers.

The **Panamatic®** Midi enhances infection control while maintaining high standards of care.

With innovative features, antimicrobial protection, and advanced technology, it meets thermal disinfection guidelines for safe utensil reuse.

Features:

-  Hands free
-  Antimicrobial surfaces
-  Thermal disinfection
-  Rotating wash nozzles
-  Top loading
-  Up to 4 items per cycle

Pulpmatic® Medical pulp macerators

If disposable pulp products are your facility's preferred method of human waste management, a medical pulp macerator is essential.

The **Pulpmatic®** Ultima is our highest-capacity bedpan macerator, designed for high-demand hospital wards and care homes, capable of processing up to 6 pulp items per cycle.

Features:

-  Hands free
-  Antimicrobial surfaces
-  Rapid cycle speeds
-  Low operating costs
-  Top loading
-  Up to 6 items per cycle

DDC Refurbishments & Fit-Outs

As part of our ongoing investment in supporting UK care homes, we now offer a complete design and construction service.

We conduct site surveys, advise on equipment, design layouts, and recommend best practices for optimal infection control.

From new builds to refurbishments, we supply everything needed for sluice rooms, serving as your single point of contact for all sluice room requirements.

DDC Service & Maintenance

Patient safety from preventable HCAs is a top priority in every care setting.

To achieve this, reliable sluice room solutions and equipment are essential, and this can only be ensured through regular servicing and maintenance.

DDC's team of highly skilled, directly employed engineers are equipped to service all makes and models of sluice machines, ensuring your equipment is up and running quickly and efficiently.

Top 10 service benefits
