

# PANAMATIC® MIDI BEDPAN WASHER

## Meet the new Panamatic Midi Bedpan Washer Disinfector with cutting-edge efficiency and enhanced infection control

The ever-popular Panamatic Midi has been reinvigorated to tackle your most prominent waste disposal challenges, balancing the highest hygiene standards with optimal energy efficiency.

Introducing innovative new features and enhanced antimicrobial protection, the Panamatic Midi is set to enhance your facility's infection control processes while upholding your dedication to exceptional levels of care.

### Expanded Capacity for Flexibility

In response to the growing requirements of busy wards and homes, the Panamatic Midi now features a remarkable 25% increase in capacity, accommodating two pans and two bottles in a single cycle. This aligns its capacity with the Optima 2, offering an even more dynamic choice of models to suit your facility's demands.

### Energy Efficiency for Cost Savings

DDC Dolphin's commitment to sustainability and cost-effectiveness is evident in the newly updated Panamatic Midi. Based on a full load, the new Panamatic Midi's enhanced capacity makes it 33% more energy and water-efficient than the previous model. So you can wash more bedpans for the same energy and water consumption as before. Hospitals and care homes can experience significant operational cost savings without compromising on the quality of bedpan disinfection.

## User Centric Design Enhancements

- An ultrasonic foot sensor elegantly replaces the old foot cup, eliminating dirt traps and enhancing hygiene.
- Updated and clear symbols for 'in cycle' and 'cycle complete' provide intuitive operation.
- Increased antimicrobial surfaces, 2.5 times larger than on previous models.
- Stainless steel side panels to cover the rear water tank, enhancing both aesthetics and durability, while simplifying cleaning.

# PANAMATIC® MIDI BEDPAN WASHER

## Advanced Polygiene Antimicrobial Protection

The new Panamatic Midi takes infection control to the next level with an expansive antimicrobial touch area that is 2.5 times larger than previous models. Impregnated with leading-edge Polygiene antimicrobial protection in the Panamatic Midi's lid and front panel ensure a robust defence against harmful pathogens.

Polygiene antimicrobial powder has been tested and proven to reduce the growth of various bacteria strains by up to 99.99%, meeting the rigorous standards of ISO 22196:2011 and it reduces the growth of Campylobacter, E.coli, Listeria, MRSA, Pseudomonas and Salmonella by up to 99.99%.

The New Panamatic Midi is perfect for high-demand care settings, wards, small care settings, and standard recovery wards. It accommodates up to four reusable items in a seven-minute cycle.

## Benefits

Expansive antimicrobial touch area that is 2.5 times larger than previous models

33% more energy and water efficient than the previous model.

25% increase in capacity, accommodating two pans and two bottles in a single cycle.

User-centric design enhancements
